[About Digits Therapy](#)

[Contact](#)

Dealing with your child's developmental growth is challenging, but Digits Therapy can help. We provide occupational therapy services and family-centered activities that will give your child the support they need to reach their full potential.

Our Services

Digits Therapy has several programs and services that help children who have a disability, or have been injured, function as independently as possible.

Occupational Therapy

- Consultations
- Evaluations
- Treatment

School Readiness Programs

- Handwriting Classes
- Social Skills Classes

Family-Centered Activities

- Friday Nights
- Parent/Caregiver Support Group
- Adult and Pediatric First Aid/CPR/AED Classes

Forms and Handouts

About This Project

Client: Digits Occupational Therapy
Date: 2018–2019
Role: Website Development, Graphic Design

Project Overview

For Digits Occupational Therapy, I created a colorful one-page sample website designed to capture the imaginations of young visitors and their families who need rehabilitative care.

This site features original illustrations by Alexandra Erkaeva, bringing a friendly, whimsical feel based on my design concepts and (rough) drawings. Alexandra's art perfectly complements the intention behind the organizations—fun and care at any age.

This website was built to be flexible and adaptable, the design works seamlessly within CMS platforms like WordPress and Drupal or as a static site.
